This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

UNIVERSITY.

Printed at the State Printing Office, Sacramento.
J. D. Young, Superintendent.

PREFACE.

This volume is a result of the endeavor to utilize all the resources of a comparatively small but valuable library of reference. Two working tools of the collection are the short-title analytical Author Catalogue and the full-title classified Subject Catalogue. Early in our experience, however, it became evident that the cataloguing ordinarily done was insufficient to meet the demands of university study, and the practice of indexing books and magazines immediately upon their receipt was begun.

To prevent the subject catalogue from attaining an unwieldy growth and to retain its character as an actual shelf-guide, the experiment was made of writing the index upon sheets of note paper size arranged alphabetically in boxes placed upon the librarian's desk where it was centrally located for purposes of reference and available for the insertion of fresh entries at any moment. Fourteen years of trial have demonstrated the success of the experiment as a labor and time-saver in the daily assistance to readers.

Generally, nothing less in extent than a ten octavo-page article has been entered in the index. Dates following the name of a person are those of his birth and death. Roman numerals (excepting the lower-case v. for volume) signify a series, period or portion of a work. Volume and page numbers are separated by a colon. A dash after the page number denotes continuation of the article.

A word of explanation is needed. Important and useful as indexing may be, to be done at all in a library where the entire labor is performed by two persons, it must be executed in the most expeditious manner consistent with accuracy, and many of the niceties of bibliographic work must be disregarded. As, however, this volume will be consulted mainly by the professional librarian, it is hoped that the use of abbreviated titles, the omission of initials, etc., may not seriously affect its value. A vast number of references, since printed in Poole's Index to periodical literature, have been omitted; a few only, by reason of local authorship or interest, have been retained.

During the progress of this Index through the press a large number of books and periodicals have been received, and references to them, falling under the first part of the alphabet, will appear in the second volume, for which sufficient material will have accumulated when an additional forty or fifty thousand volumes have accrued.

JOSEPH C. ROWELL,
Librarian.

ABBREVIATIONS.

Abbreviations of fore-names of persons commonly used are those recommended by the American Library Association.

— Acad. Sci. Mor. = Académie des Sciences Morales et Politiques de l'Institut de France.
— Berlin Akad. Abh. = Berlin. Kgl. Preuss. Akademie der Wissenschaften, Abhandlungen.
— D. Dante-Gesell. = Jahrbuch der deutschen Dante-Gesellschaft.
— Diss. = Dissertations.
— Engl. Stud. = Englische Studien.
